

ABDUL RAHMAN

DEVOPS / CLOUD ENGINEER

Chennai, Tamil Nadu | +91-8110996313 | abdulrahman6148@gmail.com | [linkedin.com/in/rahman-devops](https://www.linkedin.com/in/rahman-devops) | github.com/rahman5828

PROFESSIONAL SUMMARY

Early-career DevOps / Cloud Engineer with hands-on internship, trainee, and project experience across cloud infrastructure, containers, CI/CD, and Linux automation. Practical experience migrating infrastructure to managed cloud services, building CI/CD pipelines, and monitoring systems, currently strengthening fundamentals through a structured DevOps pre-internship program. Seeking a Junior/Associate DevOps Engineer opportunity to contribute and grow long-term.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, S3, IAM, VPC, CloudWatch, RDS)
- **DevOps & CI/CD:** Git, GitHub, GitHub Actions, Jenkins, Docker, Docker Compose, Kubernetes
- **Infrastructure as Code:** Terraform, Ansible
- **Monitoring & Observability:** Prometheus, Grafana, Alertmanager, Loki, CloudWatch
- **Operating Systems:** Linux
- **Programming & Scripting:** Python, Bash
- **Backend:** FastAPI, REST APIs
- **Databases:** PostgreSQL, Redis, MongoDB, Kafka

EXPERIENCE

DevOps Engineer Trainee | Saasta — AttendX (SaaS/FastAPI microservices)

Jul 2026 – Aug 2026

Remote

- Migrated a ~35-container local development environment to managed cloud services (PostgreSQL, Redis, Kafka, S3-compatible storage), cutting infrastructure resource consumption by over 85% and optimizing the Docker image to ~1.8GB.
- Deployed and maintained FastAPI microservices on AWS EC2, managing database schema changes through Alembic migrations across PostgreSQL.
- Built GitHub Actions CI/CD pipelines with SSH-based deployment automation; configured CloudWatch monitoring and performed load testing with k6.
- Diagnosed and resolved SonarCloud Quality Gate issues — hardcoded credentials, timezone-aware datetime handling, duplicated literals — achieving a passing quality gate.

DevOps Intern | Elevate Labs

Aug 2025 – Sep 2025

Remote

- Built CI/CD pipelines using Jenkins and GitHub Actions; deployed containerized applications on AWS using Docker and Kubernetes.
- Provisioned cloud infrastructure using Terraform and managed configuration for consistent, repeatable deployments.
- Configured monitoring and observability using Prometheus, Grafana, and CloudWatch for system health tracking and incident response.
- Automated operational tasks and troubleshooting workflows using Python and Bash scripting.

DevOps Pre-Internship / Technical Program | PearlThoughts

Aug 2026 – Present

Remote

- Recently began a structured DevOps pre-internship program, working hands-on with Linux fundamentals, Git/GitHub workflows, Docker, and CI/CD concepts.
- Contributing to the devops-crm-project repository to practice version control, containerization, and deployment workflows.

PROJECT

AI DevOps Copilot (Opscope) | Personal Project

In Development

- Building an AI-assisted DevOps incident detection and analysis tool using FastAPI and the Google Gemini API.
- Implementing observability with Prometheus, Grafana, and Alertmanager; containerized with Docker/Docker Compose.
- Setting up GitHub Actions CI/CD and automated pytest testing.

EDUCATION

B.E., Computer Science and Engineering

2025

Mother Teresa College of Engineering and Technology, Pudukkottai | CGPA: 7.6/10 (First Class)

CERTIFICATIONS

- AWS Cloud Practitioner — AWS Cloud Quest
- Linux Essentials — Besant Technologies
